

ATS Score: 84%

Executive Summary:

Based on a comprehensive review of the extracted text, this candidate presents a strong profile aligned with the Software Engineering sector, operating significantly at a Entry-level capacity. Identified core competencies span a wide range of technological and professional skills including but not limited to Css, Node, Java, Express, Spring. The candidate's career trajectory demonstrates a clear capacity for growth and adaptability across different operational environments. While the raw technical alignment is promising, there are substantial opportunities to optimize the profile structure to better resonate with modern Applicant Tracking Systems (ATS). For example, leveraging quantifiable metrics (e.g., 'improved system efficiency by 25%') and aggressively integrating targeted high-value industry keywords into the experience section would yield a significantly higher conversion rate. Furthermore, establishing a strong executive summary at the top of the document could immediately bridge the gap between their technical hard skills and high-level strategic impact. Overall, the foundational experience is solid, but transforming this document from a standard chronological work history into an accomplishment-driven marketing asset will be critical for navigating highly competitive recruitment funnels in Software Engineering. With strategic keyword injection and improved formatting hygiene, this profile is well-positioned to secure interviews at top-tier organizations.

Profile Overview:

Strength: Strong Match

Experience Level: Entry-level

Key Domain: Software Engineering

Key Strengths:

- Demonstrated knowledge in Css
- Demonstrated knowledge in Node
- Demonstrated knowledge in Java

Missing Skills:

- Advanced Cloud Architecture
- System Design Metrics

Improvement Suggestions:

- Incorporate stronger action verbs (led, optimized, engineered)
- Include explicit metrics (e.g., 'improved performance by 20%')

ATS Optimization Tips:

- Integrate more specific Software Engineering keywords
- Ensure your formatting is single-column for maximum parseability

Job Role Suitability:

- Highly aligned for Entry-level Software Engineer roles

Job Recommendations:

Software Engineer at Industry Leading Tech Firm (84% Match)

Location: Remote / Hybrid | Level: Entry-level

An excellent opportunity utilizing your skills in Css, Node.
